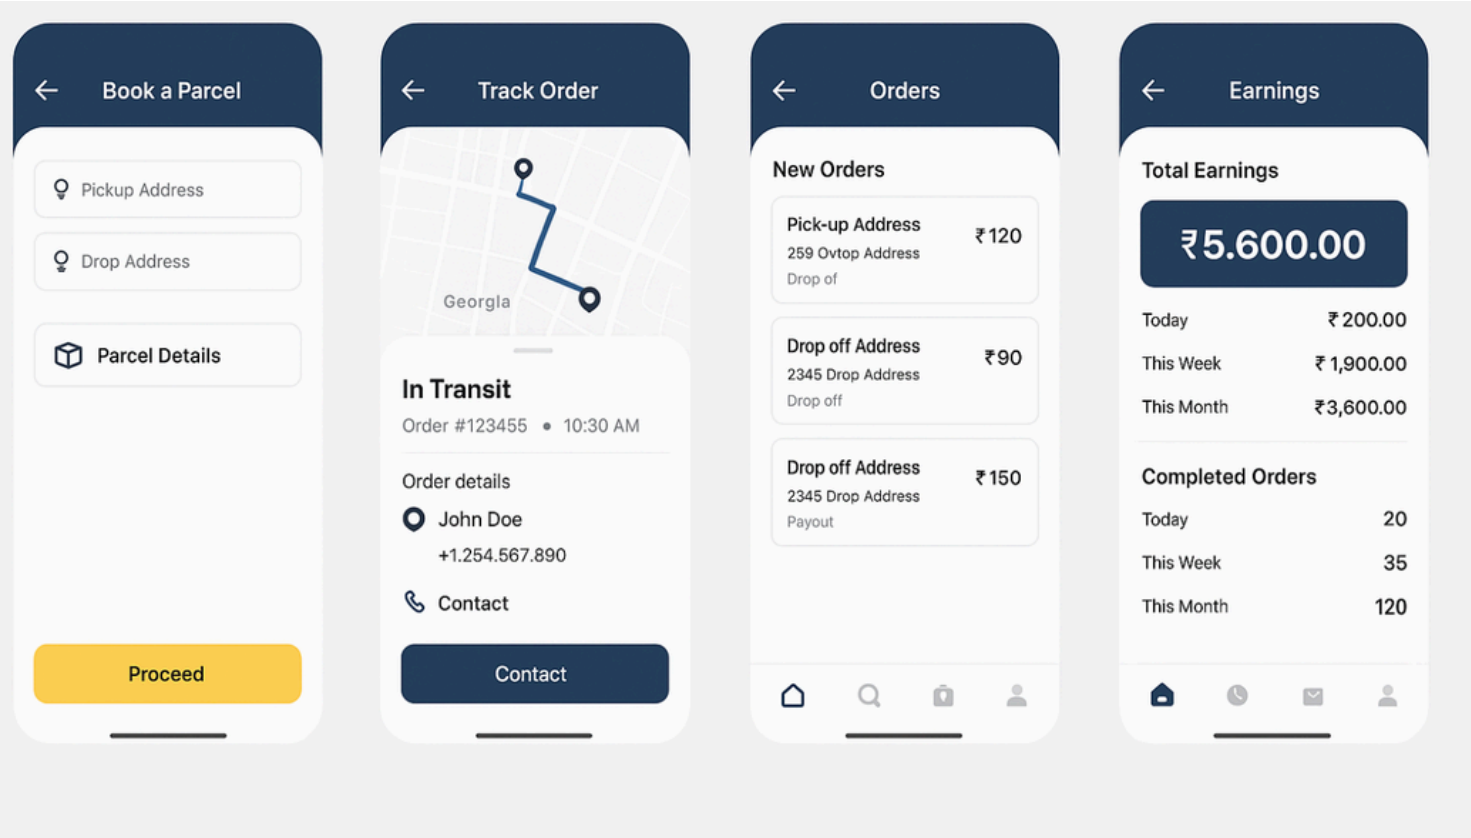
App Demo via Doc

Zoopup



✅ Demo Scenario Example

A customer books a courier to send a document from Delhi to Noida.
They enter pickup & delivery address → Pays via UPI → A vendor nearby accepts → They track the order → It gets delivered with a photo proof → The customer rates the experience.
Meanwhile, the vendor earns ₹80 for the task, which reflects in their wallet.

Explanation of every point

🔹 1. CUSTOMER SIDE

👨‍💼 Registration/Login

- Users can register using their phone number (OTP verification) or social login (Google, Facebook).
- After login, users land on the dashboard/home page.

📦 Parcel Booking

- Users click on “Book Parcel”.
- They enter:
  - Pickup Address (can use GPS or manual input)
  - Delivery Address
  - Parcel Category (document, box, fragile item, etc.)
  - Weight and Size
  - Preferred Time Slot
- App calculates an estimated cost based on distance and parcel type.

💳 Order Confirmation & Payment

- After entering details, the user sees:
  - Estimated delivery time
  - Price breakdown (base fare + distance charges + taxes)
- User selects a payment method (UPI, Cards, Wallets).
- After payment, the order is confirmed and saved in the system.

📲 Live Order Tracking

- Once a vendor accepts the order, the customer can:
  - Track the delivery agent’s real-time location
  - View ETA countdown
  - Access vendor contact in case of issue

✅ Delivery Completed

- The customer receives:
  - Notification when delivery is complete
  - Option to download invoice
  - Proof of Delivery (Photo or Signature) uploaded by vendor

⭐ Ratings & Feedback

- User gives a rating out of 5 stars
- Can leave a short review for the delivery experience

🔹 2. VENDOR SIDE (Delivery Agent / Courier Partner)

👮 Login & Profile Setup

- Vendors log in with a secure phone number or email
- They create a profile including:
  - Vehicle Type
  - Serviceable Areas
  - Availability Status

📥 Receive Orders

- Vendors see a list of new orders within their service radius
- Each order shows:

    - Pickup & delivery address
    - Parcel details
    - Payout per delivery

👍 Accept & Navigate

- Vendor taps Accept
- The app opens in-built navigation to pickup location
- Smart routing is provided using Google Maps or Mapbox

📸 Proof of Pickup & Delivery

- At pickup, vendor can optionally:
    - Capture photo
    - Mark item as picked
- **At delivery:**
    - Customer signs on device or vendor takes a photo
    - Order marked as Delivered

📊 Earnings Dashboard

- Vendor sees:
    - Completed Orders
    - Pending Payouts
    - Total Earnings (weekly/monthly)
    - Can raise disputes for payments if needed

🛠️ Admin Panel (Your Side)

- Dashboard: Overview of all active deliveries
- Manage Users & Vendors: Approve, block, or monitor
- Order Logs: Real-time view of orders and delivery status
- Payment Reports: Who paid, how much, vendor earnings
- Notification Management: Send bulk messages or alerts
