Proposal for Commercial Website Development

Project Objective:

To design and develop a professional, responsive, and SEO-friendly informational website to showcase up to 25 commercial products related to ventilation, fans, fittings, and refrigeration. The website will include product detail pages and a customer enquiry page to facilitate lead generation.

Scope of Work:

1. Key Features & Deliverables

A. Website Design & Development

- Custom homepage design tailored to the client's brand
- Product listing page with categories
- Individual product detail pages (up to 25)
  - Product images
  - Technical specifications
  - Key features
- Static pages:
  - Home
  - About Us
  - Products
  - Enquiry Form
  - Contact Us
- Responsive design (mobile, tablet, desktop compatibility)
- Basic SEO setup (metadata, ALT tags, sitemap submission)
- WhatsApp chat integration
- Google Maps embedding on Contact page (if available)
- SSL certificate setup (if hosted by us)
- Speed optimization and security hardening
- CMS setup (WordPress or similar) for content management
- Basic integration of Google Analytics, Google Search Console

B. Enquiry Form

- Simple and user-friendly enquiry form for customers to:

    - Select product(s) of interest
    - Mention requirements
    - Share contact details
- Email notifications to the admin on every form submission
- Thank you/confirmation message post-submission

C. Admin Dashboard (CMS)

- Admin login to add/edit/delete products
- Edit content on pages
- View enquiry form submissions (optionally store them in database)

---

2. Requirements for Client

❖ Product Information

For each product, please share:

- Product name
- High-quality product images
- Short description or specifications
- Key features or technical details
- Product category
- Any downloadable brochures (PDFs)

❖ Website Content

- Written content for:
    - Home Page (intro text, banners, services overview)
    - About Us Page
    - Product category descriptions (if any)
    - Any brand taglines or messaging
- Contact page content

---

3. Project Timeline

Task	Duration
Requirement Gathering & Design Approval	2-3 Days
UI/UX Design & Feedback	3-4 Days
Development (Pages + CMS + Forms)	5-6 Days
Product Upload (25 items)	2 Days

Task	Duration
Testing (Responsive + Functionality)	2 Days
Revisions & Finalization	2 Days
Deployment & Go Live	1 Day
Total Estimated Time:	**15–16 Working Days**

---

4. Costing

Item	Description	Cost (INR)
Website Design & Development	Custom design/5 pages/25 products	₹ 28000 + 18% GST
Total Payable:		**₹ 29400**
Hosting & Domain:		₹ 5000 + 18% GST
		₹ 5900

---

5. Exclusions

- Hosting & domain charges (can be arranged /purchased by client)
- Content writing & product descriptions (to be provided by client)
- Paid plugins, themes, or third-party APIs unless specified
- Advanced CRM, payment gateway, or ecommerce features
- Multi-language setup
- SMS/Email automation beyond form notification
- Ongoing maintenance post-delivery (can be offered as AMC)

---

6. Payment Terms

- 50% advance to initiate project
- 30% upon design approval
- 20% upon final deployment

---

7. Post- Launch Support

- 1 month of calibration period (minor changes like font, colour, text & 20% layout)
