Proposal for Sakthie Solutions

Objective

To redesign the existing Sakthie Solutions website into a modern, responsive, and user-friendly platform that effectively communicates their services and expertise in financial solutions, while enhancing user experience and improving digital presence.

Scope of Work

1. Design & User Experience

- Premium Template UI/UX design as per financial services related with standard customization.
- Revamped homepage with clear service categories, banners, and call-to-action buttons.
- Clean, professional theme with intuitive navigation.
- Mobile-first design (fully responsive for mobile, tablet, and desktop).

2. Website Pages (Tentative Structure)

- **Home**
- **About Us**
- **Our Services**
    - Mutual Fund
    - Insurance (Health, Life, General)
    - Loans (Home Loan, Personal Loan, Business Loan)
    - Fixed Deposits
    - Retirement Planning
    - Tax Saving Investments
- **Why Us / USP**
- **Blog/Insights** (for updates, tips, market news)
- **Testimonials**
- **Contact Us** (with integrated Google Maps and contact form)
- **Privacy Policy / Disclaimer / T&C**

3. Functionality

- WhatsApp Chat Integration
- Lead generation forms (service inquiry forms on each service page)
- Basic SEO setup (meta tags, URLs, sitemap)
- Social media icons & linking
- Blog module with category management

- SSL certificate installation (if not already present)

4. Admin Panel (CMS)

- Easy-to-use backend (WordPress preferred)
- Content editing access (text, images, blog, banners, etc.)
- Page management

5. Performance Optimization

- Page speed optimization
- Lazy loading of images
- Cache & minification
- Image compression

Exclusions

- Custom API integrations with third-party financial portals (e.g., Mutual Fund platforms, Insurance APIs)
- SMS or email automation services (unless specified)
- Content writing beyond 8–10 pages (can be added at additional cost)
- Paid plugins, themes, or tools (if needed, will be billed separately)
- Domain and hosting charges (client to provide)
- Multilingual setup (only single language – English – included)
- Ongoing maintenance post-launch (optional at extra cost)

Deliverables

- Fully redesigned and responsive website
- UI/UX design files (if required)
- WordPress CMS setup
- Content migration from old site (text + images)
- Basic SEO setup
- Admin manual/training (1 training session)
