Proposal for SimpleITR.com

Objective

This redesign project will transform **SimpleITR.com** into a fast, mobile-friendly, and high-converting website. It will better reflect the company's services in ITR, GST, and other financial solutions, improve trust and accessibility, and enable better tracking and online visibility through Google assets.

Scope of Work

Deliverables

1. UI/UX Design

- Premium Template UI/UX design as per services related with standard customization.
- Service page templates (e.g., ITR Filing, GST, Business Registration, etc.)
- Responsive design for all devices (mobile, tablet, desktop)
- User flow optimization for faster navigation and lead capture
- Custom icons/graphics aligned with financial and tax services

2. Content Structuring

- Structuring content for SEO and readability
- Incorporation of trust signals (e.g., testimonials, reviews, certifications)
- FAQs section for each service page
- Highlight of pricing (if applicable)

3. Website Development

- CMS Platform: WordPress (or alternative based on preference)
- Premium theme customization
- Fast-loading, lightweight design
- Clear and optimized call-to-actions (Book Now, Contact Us, WhatsApp)
- Services integration with inquiry/contact forms
- WhatsApp chat widget integration
- Blog module setup

4. Functional Features

- Contact Forms with email notification
- Google reCAPTCHA on forms to prevent spam

- Appointment booking form (if applicable)
- SEO optimized URLs, meta tags, and heading structure
- Website speed optimization (image compression, cache, minification)
- GDPR-friendly cookie notice

5. Google Assets Integration

- **Google Analytics GA4** (traffic monitoring)
- **Google Search Console** (SEO indexing and health)
- **Google Tag Manager** (tracking code management)

6. Security & Maintenance

- SSL installation & configuration
- Basic firewall and spam protection plugins setup
- Admin panel hardening
- Monthly backup plugin setup

7. Training & Handover

- Admin panel access and training (via Zoom or video guide)
- One month post-launch support for bug fixes

Exclusions

- Hosting or domain purchase (to be provided by the client)
- Copywriting or content creation beyond restructuring existing content
- Custom application development or login/portal features
- Payment gateway integration (unless specifically requested)
- Monthly SEO or digital marketing (available as an add-on)

Timeline

Phase	Task	Duration
Phase 1	Discovery & Planning	2 Days
Phase 2	UI/UX Design (Homepage + 3-5 templates)	5 Days
Phase 3	Development (Frontend + Backend Setup)	6 Days
Phase 4	Content Upload & SEO Setup	3 Days
Phase 5	Testing (Mobile/Desktop/Speed/SEO)	2 Days
Phase 6	Revisions & Final Launch	2 Days

Total Estimated Time: 15–20 working days
